

INDEX TO VOL. XVI.

- AUER, J.** See MELTZER and AUER, 233.
- BARIUM** excretion, 147.
- BENEDICT, F. G.** The nutritive requirements of the body, 409.
- Blood pressure, affected by bone marrow, 110.
- Blood-salts, effect on contractility, 191.
- Bone marrow, action on blood pressure, 110.
- BROWN, O. H., and D. R. JOSEPH.** The effects of intravenous injections of extracts of the bone marrow of swine on the blood-pressure in dogs, 110.
- CARLSON, A. J.** Comparative physiology of the invertebrate heart. — V. The heart rhythm under normal and experimental conditions, 47.
- CARLSON, A. J.** Comparative physiology of the invertebrate heart. — VI. The excitability of the heart during the different phases of the heart beat, 67.
- CARLSON, A. J.** Comparative physiology of the invertebrate heart. — VII. The relation between the intensity of the stimulus and the magnitude of the contraction, 85.
- CARLSON, A. J.** Comparative physiology of the invertebrate heart. — VIII. The inhibitory effects of the single induced shock, 100.
- CARLSON, A. J.** On the cause of the cessation of the rhythm of automatic tissues in isotonic solutions of non-electrolytes, 221.
- CARLSON, A. J.** On the chemical conditions for the heart activity, with special reference to the heart of *Limulus*, 378.
- CARLSON, A. J.** The presence of cardio-regulative nerves in the lampreys, 230.
- CLOSSON, O. E.** See MENDEL and CLOSSON, 152.
- CLOSSON, O. E.** The elimination of creatinin, 252.
- Colloids, coagulation, and contractility, 117.
- Contractility and coagulation of colloids, 117.
- Creatinin elimination, 252.
- DRYFUS, B. J., and C. G. L. WOLF.** The physiological action of lanthanum, præsodymium, and neodymium, 314.
- ERLANGER, J.** Further studies on the physiology of heart block. — The effects of extra systoles upon the dog's heart and upon strips of terrapin's ventricle in the various stages of block, 160.
- Equilibrium in solutions of phosphates, 188.
- Excretion of inorganic compounds, 147, 152.
- FRIES, J. A.** Intestinal gases of man, 468.
- GUTHRIE, C. C. and F. H. PIKE.** The effect of changes in blood pressure on respiratory movements, 475.
- HART, E. B.** See JORDAN, HART, and PATTEN, 268.
- Heart block, 160.
- , chloralhydrate, 483.
- , contractility affected by salts, 191.
- , excitability, 67.
- , extra systoles, 160.
- , filling, 325.
- , inhibited by single induced shock, 100.
- , inhibition of tonus, 105.
- , invertebrate, 47, 67, 100.
- , nerves in lampreys, 230.
- , refractory period, 67.

- Heart rhythm, 47.
 —, affected by electrolytes, 221, 378.
 —, volume curve, 325.
- HENDERSON, L. J. Note on equilibrium in solutions of phosphates, 188.
- HENDERSON, Y. The volume curve of the ventricles of the mammalian heart, and the significance of this curve in respect to the mechanics of the heart beat and the filling of the ventricles, 325.
- HYDE, I. H. A reflex respiratory centre, 368.
- JORDAN, W. H., E. B. HART, and A. J. PATTEN. A study of the metabolism and physiological effects of certain phosphorus compounds with milch cows, 268.
- JOSEPH, D. R. See BROWN and JOSEPH, 110.
- LACTIC acid in metabolism, 129.
 Lanthanum, physiological action, 314.
- LILLIE, R. S. The relation between contractility and coagulation of the colloids in the Ctenophore swimming-plate, 117.
- LUSK, G. See MANDEL and LUSK, 129.
- MAGNESIUM salts, physiological and pharmacological action, 233.
- MANDEL, A. R., and G. LUSK. Lactic acid in intermediary metabolism, 129.
- MARTIN, E. G. A study of the relations of the inorganic salts of the blood to the contractions of heart muscle and skeletal muscle, 191.
- MELTZER, S. J., and J. AUER. Physiological and pharmacological studies of magnesium salts. — III. The narcotizing effect of magnesium salts upon nerve fibres, 233.
- MENDEL, L. B., and O. E. CLOSSON. The paths of excretion for inorganic compounds. — III. The excretion of rubidium, 152.
- MENDEL, L. B., and D. F. SICHER. The paths of excretion for inorganic compounds. — II. The excretion of barium, 147.
- Metabolism, affected by phosphorus, 268.
 —, lactic acid, 129.
- Muscle, contractility affected by salts, 191.
- NEODYMIUM, physiological action, 314.
- Nerve fibres, affected by magnesium salts, 233.
- Nutritive requirements of body, 409.
- OVA, affected by poisons, 1.
- PATTEN, A. J. See JORDAN, HART, and PATTEN, 268.
- Phosphorus metabolism, 268.
- PIKE, F. H. See GUTHRIE and PIKE, 475.
- Poisons, action on *Fundulus*, 1.
- Præsyodymium, physiological action, 314.
- RESPIRATORY centre, reflex, 368.
 — movements affected by blood pressure, 475.
- Rhythm, affected by electrolytes, 221.
- Rubidium excretion, 152.
- SCHULTZ, W. H. The effect of chloralhydrate upon the properties of heart-muscle, 483.
- SICHER, D. F. See MENDEL and SICHER, 147.
- SOLLMANN, T. The effects of a series of poisons on adult and embryonic *Funduli*, 1.
- WILSON, T. M. On the comparison of conductivity and freezing points of small quantities of body fluids in health and disease, 438.
- WOLF, C. G. L. See DRYFUSS and WOLF, 314.

THE AMERICAN JOURNAL OF PHYSIOLOGY

EDITED FOR

The American Physiological Society

BY

H. P. BOWDITCH, M.D., BOSTON

R. H. CHITTENDEN, Ph.D., NEW HAVEN

W. H. HOWELL, M.D., BALTIMORE

FREDERIC S. LEE, Ph.D., NEW YORK

W. P. LOMBARD, M.D., ANN ARBOR

G. N. STEWART, M.D., CHICAGO

W. T. PORTER, M.D., BOSTON

VOL. XVI.—No. IV.

Issued August 1, 1906

BOSTON, U.S.A.
GINN AND COMPANY
1906

CONTENTS

THE NUTRITIVE REQUIREMENTS OF THE BODY. <i>By Francis Gano Benedict</i>	409
ON THE COMPARISON OF CONDUCTIVITY AND FREEZING POINTS OF SMALL QUANTITIES OF BODY FLUIDS IN HEALTH AND DISEASE. <i>By Thos. M. Wilson</i>	438
INTESTINAL GASES OF MAN. <i>By J. August Fries</i>	468
THE EFFECT OF CHANGES IN BLOOD-PRESSURE ON RESPIRATORY MOVEMENTS. <i>By C. C. Guthrie and F. H. Pike</i>	475
THE EFFECT OF CHLORALHYDRATE UPON THE PROPERTIES OF HEART-MUSCLE. <i>By W. H. Schultz</i>	483

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars; to subscribers in other countries, five dollars and twenty-five cents (£1 2s.; marks, 22; francs, 27). The price of Volumes One, Two, and Three will be six dollars to domestic subscribers, and six dollars and twenty-five cents to foreign subscribers. All subscriptions are payable in advance.

Subscriptions, manuscript, and all other communications should be sent to Dr. W. T. PORTER, 688 Boylston Street, Boston, Mass., U.S.A.

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

The American Journal of Physiology is represented:

In America, by GINN & COMPANY, 29 Beacon Street, Boston, Mass.

In Germany, by R. FRIEDLÄNDER & SOHN, Berlin, N.W., Carlstrasse 11.

Copyright, 1906, by GINN & COMPANY.

Printed by John Wilson and Son, at The University Press, Cambridge, Mass.

Entered at the Boston, Mass., Post-Office as second-class mail matter, Feb. 11, 1903.
